

Anguilla is a beautiful island located in the Caribbean. Anguilla is known for its crystal clear waters, extraordinary vistas and world class accommodations but now it has also become a well renown offshore jurisdiction.

Anguilla is a British overseas territory in the Caribbean. Like other British dependencies, Anguilla has its own government which practices English Common Law. The main difference with other jurisdictions in the area is that Anguilla is a ZERO tax location for everyone, including its residents. As a result of this, Anguilla has become one of the most flexible offshore jurisdictions.

Using the Latest technology, ACORN (Anguilla's Commercial Online Registration Network) allows companies to be incorporated instantly from anywhere in the world, 24-hours a day, 365 days a year. ACORN also enables all other corporate registration activities and filings permitted under the relevant legislation to be undertaken online.
